

# EMS PIPS

## WHAT?

PIPS, Performance Improvement and Patient Safety, programs are made to continuously assess, monitor, evaluate, and improve the effectiveness of patient care. This ultimately improves patient outcomes.

## WHY?

EMS is a huge part of the trauma, stroke, and cardiac care systems. Better relationships and open communication between EMS and hospitals provides the opportunity for better patient care.

## PURPOSE?

To create a collaborative effort to give kudos and suggestions to improve patient care along with eliciting feedback from EMS to make EMS provider's experience better when bringing patients into the Erlanger Health System. Together we will improve outcomes, eliminate problems, and reduce variation.

## WHEN?

Quarterly meetings in January, April, July, and October. Lunch will be provided. The first meeting is scheduled January 11th from 11:30 a.m. – 1 p.m. in the POB (map on back).

## WHO?

Any and all EMS providers that bring patients to Erlanger Health System.
